Gunpoint Exploration Ltd.

Notes to Consolidated Financial Statements

For the six months ended June 30, 2021 and 2020

(Amounts expressed in thousands of Canadian dollars, except where indicated)

1 Nature of operations and going concern

Gunpoint Exploration Ltd. (“Gunpoint” or the “Company”) was incorporated under the laws of British Columbia on October 27, 1989. Gunpoint is focused on the acquisition and exploration of precious metals located in the United States, Mexico and Guatemala.

Gunpoint is domiciled in Vancouver, Canada and its common shares are listed on the TSX Venture Exchange under the trading symbol “GUN”. The Company is controlled by Chesapeake Gold Corp. (“Chesapeake”) which owns 74% of the Company. The Company’s registered office is at Suite 1201 – 1166 Alberni Street, Vancouver BC, V6C 3A6, Canada.

These consolidated financial statements have been prepared on the basis that the Company is a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. The Company had consolidated net loss of \$766.5 for the six months period ended June 30, 2021 (2020 – net income - \$320.5), and an accumulated deficit of \$47,944.9 as at June 30, 2021 (December 31, 2020 - \$47,178.4). The Company has a working capital deficiency of \$860.3 as at June 30, 2021 (December 31, 2020 - \$664.2). To date, the Company has not generated operating revenue from its mineral properties. The ability of the Company to continue as a going concern is dependent upon obtaining additional equity and/or debt financing for the exploration and development of its mineral properties. These conditions indicate the existence of material uncertainties that may cast substantial doubt about the Company’s ability to continue as a going concern.

The Company is currently holding its mineral properties on care and maintenance until additional financing can be raised from joint venture partners, divestures and investors.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or results of operations at this time.

These consolidated financial statements do not include any adjustments to the recoverability and reclassification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern and these adjustments could be material.

2 Basis of presentation

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34 – Interim Financial Reporting as issued by the International Accounting Standards Board (“IASB”). Accordingly, certain disclosures included in annual financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the IASB have been condensed or omitted and these unaudited condensed interim consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended December 31, 2020.

The Company’s management makes judgments in its process of applying the Company’s accounting policies in the preparation of its unaudited interim condensed consolidated financial statements. In addition, the preparation of the financial data requires that the Company’s management make assumptions and estimates of the effects of uncertain future events on the carrying amounts of the Company’s assets and liabilities at the end of the reporting period and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates and the resulting effects on the carrying amounts of the Company’s assets and liabilities are accounted for prospectively. The critical judgments and estimates applied in the preparation of the Company’s unaudited condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company’s consolidated financial statements for the year ended December 31, 2020. In addition, the accounting policies applied in these unaudited condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company’s audited financial statements for the year ended December 31, 2020.

The Company’s interim results are not necessarily indicative of its results for a full year.

These condensed consolidated interim financial statements were approved and authorized for issue by the Board of Directors on August 24, 2021.

Notes to Consolidated Financial Statements

For the six months ended June 30, 2021 and 2020

(Amounts expressed in thousands of Canadian dollars, except where indicated)

3 Management of capital

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern in order to pursue the development of its resource properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

In the management of capital, the Company includes the components of shareholders' equity as well as cash and investments. In order to maximize ongoing development efforts, the Company does not pay out dividends.

The Company's investment policy is to invest its cash in highly liquid short-term interest-bearing investments, such as Canadian Government treasury bills, banker's acceptances or Guaranteed Investments Certificates, with initial maturity terms less than one year from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may attempt to issue new shares, issue new debts, acquire or dispose of assets or adjust the amount of cash and investments. There were no changes in the Company's approach to capital management during the six months ended June 30, 2021. The Company is not subject to externally imposed capital requirements.

4 Financial instruments

Fair values of financial instruments

The fair values of financial instruments are summarized as follows:

	June 30, 2021		December 31, 2020	
	Carrying value \$	Fair value \$	Carrying value \$	Fair value \$
Financial assets				
Cash	219.3	219.3	385.2	385.2
Long-term investment	1,361.4	1,361.4	2,026.4	2,026.4
Financial liabilities				
Accounts payable & accrued liabilities	394.4	394.4	354.7	354.7
Due to related party	1,028.9	1,028.9	1,032.0	1,032.0

Fair value measurements

The following table sets forth the Company's assets and liabilities measured at fair value on a recurring basis by level within the fair value hierarchy. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

	Level 1	Level 2	Level 3	Total June 30, 2021
Long-term investment	1,361.4	-	-	1,361.4
	\$ 1,361.4	\$ -	\$ -	\$ 1,361.4

The fair value of other financial instruments, including cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities, promissory note payable, and amounts due to a related party, approximate their carrying values due to the relatively short-term maturity of these instruments. The Company's policy for determining when a transfer occurs between levels in the fair value hierarchy is

to assess the impact at the date of the event or the change in circumstances that could result in a transfer. There were no transfers between the levels during the six months ended June 30, 2021.

Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash. The Company's cash is held through large Canadian financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure as described in Note 4. The accounts payable are due within the current operating period.

Market Risk

The Company's financial instruments include investments which are publicly traded and therefore subject to the risks related to the fluctuation in the equity markets. The Company closely monitors market values to determine the most appropriate course of action.

Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows from a financial instrument will fluctuate because of changes to market interest rates. The Company is exposed from time to time to interest rate risk as a result of holding fixed income cash equivalents and investments, of varying maturities. A 1% change in market interest rates would result in no significant change in value of cash and cash equivalents or fixed income securities. The risk that the Company will realize a loss as a result of a decline in the fair value of these assets is limited as they are generally held to maturity.

Foreign Exchange Rate Risk

Currency risk is the risk of a loss due to the fluctuation of foreign exchange rates and the effects of those fluctuations on the Company's foreign currency denominated monetary assets and liabilities. The Company currently operates in the United States, Mexico and Guatemala. Certain costs and expenses are incurred in US dollars, Mexican pesos and Guatemala quetzal. The Company attempts to mitigate currency risk through the preparation of short and long term expenditure budgets in the foreign currencies and planning for the conversion of Canadian dollars into foreign currencies whenever exchange rates are favourable.

Price Risk

The Company is exposed to price risk with respect to its investments, which consists of common shares of publicly-traded companies and is dependent upon the market price or the fair value of the common shares of these companies. The market price or the fair value of the common shares of publicly-traded companies can fluctuate significantly, and there is no assurance that the future market price or the fair value of those companies will not decrease significantly.
